

# Buckle 20mm

## Product Image

## Product Description

Standard 20mm Buckles are crafted from stainless steel, designed specifically for fastening pole bands in telecommunications and utility installations. These buckles ensure quick and reliable attachment of pole bands, offering durability and security in outdoor environments.

### **Key Features:**

#### **Stainless Steel Construction:**

Provides robustness and corrosion resistance, ideal for outdoor use.

#### **Standard Size:**

Designed for compatibility with 20mm pole bands.

#### **Versatile Application:**

Suitable for fastening pole bands securely to telecom poles and other utility structures.

#### **Reliable Performance:**

Ensures dependable attachment of hardware, maintaining stability and safety of installations.
