

# Universal Pole Bracket

## Product Images

## Product Description

The UPB bracket is manufactured from aluminium alloy with correspondingly high mechanical strength. Its unique patented design has been developed as a universal fitting covering all installation situations on wooden, metal or concrete poles.

It has two upper apertures, each suitable for three dropwires.

Two central apertures each suitable for either, one Aerial Cable or dropwire

One lower aperture suitable for either dropwires, Aerial Cable or stay wires.

Two recesses are provided on the bracket to facilitate use of stainless steel banding to attach the bracket to a wood or steel telephone pole.

Dimensions: 120 x 114 x 46 mm.
