

500x8.5 Standard Releasable Cable Tie (ARE50)

Product Images

Product Description

Releasable nylon cable ties are ideal for non- permanent fixing applications or where installation modifications are likely.

Our releasable cable ties are suitable for indoor or outdoor use and are manufactured to meet or exceed industry standards using high quality, virgin nylon 6/6, guaranteeing maximum reliability.

Standard releasable cable ties have a finger latch mechanism on the cable tie head to quickly and easily release the cable tie for a temporary fastening solution. The pawl is pushed down to release the cable tie easily with one hand.

Releasable cable ties are a strong fastener for a multitude of applications where easy removal is required. Ideal for uses where environmental concerns prevent the use of single use plastic. Eco friendly and time saving.

Material: Polyamide 6.6 UL94V-2.
