

PLC 1x2 Splitter without connectors

Product Images

Product Description

1x2 PLC Splitter Features & Specifications

- High Quality PLC design features a protective metal casing around the fibers
- PLC splitting mechanism divides input signal into equal parts across all output fibers
- 900µm loose tube fiber for easy stripping, splicing, or terminating
- Operating & Storage Temperature: -40 to 85°C (-40 to 185°F)
- Wavelength: 1260nm / 1650nm

1x2 PLC Splitter Applications

- Fiber to The Point (FTTX)
- Fiber to The Home (FTTH)
- Passive Optical Networks (PON)

- Gigabit Passive Optical Networks (GPON)
- Local Area Networks (LAN)
- Cable Television (CATV)
- Test Equipment
