PM6106 Intelligent Optical Power Meter

Product Images

Product Description

PM6106 power meter is an intelligent tester. Combined with LS6206 series light source, it can automatically detect the wavelength and frequency from LS6206 light source, then switch wavelength and frequency accordingly.

PM6106 power meter's internal memory can save up to 1000 records, customers could upload, edit and print the test result at any time.

The blacklight design of PM6106 power meter is special. It has 2 types of backlight. One is to adjust the backlight manually, another is the change automatically with the environment.

Features

Max 42 calibration wavelength

Automatic wavelength identification and switching (combine with LS6206 OLS)

Automatic frequency identification (combine with LS6206 OLS)

Intelligent backlight control

Up to 1000 test records storage via USB port

User self-calibrating function

10 minutes auto-off function

Up to 200 hours working time

External AC adapter to provide power

Low battery indication
