Coyote STPL 96F Box

Product Images

Product Description

The COYOTE® STP-L is a small scale, cost effective closure which provides an alternative to traditional network interface devices, while offering much greater application flexibility. The closure features a unique design with independent access. The robust latch system, paired with an intergrated overmoulded cover, allows for quick re-entry and creates a secure seal over a wide range of cable profiles.

Key Features:

Can support up to 16 drops with 2 ports for loop through.

Constructed from UV-stabilized, flame retardant material.

Robust latch system paired with factory installed gaskets allows for quick re-entry and re-use.
